On the 7th inst., at No. 1, Albany Road, the wife of A. C. Monz, of a daughter, stillborn.

From a telegraphic inquiry received from Shaughai yesterday we gather that it was reported there that a detachment of troops sent from Hongkoug to escor Consul MARSTIELD, of Foodhow, to Kucheng to inquire into the massiere near that troops have not been sen Possibly the ramour at Shanghai had its origin in the attribution to the should have been left to these gentlemen instead British Government of qualities of vigour be the proper course and the assumption community is afforded the opportunity of express was, proper would be done may bave led to the beli f that steps had already beld in Hongkong. Sir Fielding Clarke will side of the neck, a stab on the right thigh, and been taken in that direction. To send five in all probability take the chair and the Hon. hundred men of the Rifle Brigade and five Dodwell, and Mr. J. J. Francis, Q.C., hundred men of the Hongkong Regiment to speak to the resolutions. The time has been Kucheng, raze the city to the ground and rather sufortunately fixed for noon, but it is to bring back a few of the high officials for their employed who wish to attend an opporincurceration in Victoria Gaol would have tunity of doing so and that they will all be an excellent effect and would put an end to anti-foreign riots in Fuhkien and the neighbouring provinces for a long time to come. No shedding of blood would be necessary unless opposition was offered; the destruction of the city and the arrest of the responsible officials would be quite sufficient. No brought out much the same figures. There have say the punishment was excescommitted, details of which are given in hand terms, or at a margin sufficient to cover our telegram from Foochow,

A public meeting is to be held to day at which the community will have an opportunity of expressing its indignation at the exceeding 10 000 piouls daily, which fact has, of outrage and its sense of the steps that ought to-day No. 1 white milled \$3.04, No. 2 white to be taken in relation thereto. There has milled \$2.45, 10 per sent cargo \$2.04, 20 per one of the reasons being the strong antimissionary feeling that prevails in the colony It is said the missionaries bring such out rages on themselves, that they go out to nominally, for Hongkong 7-8 cents per piont found the house was burning dragged Mildred seek a martyr's crown and when they have rice, for Singapore 5 cents per pical rice, for all ontend went to the nursery, pulled the baby from got it they don't like it. But what ver may be said of the wisdom or unwisdom missionary methods no one can read the details of the ghanly batchery of defenceless women and children at Hunsang without a burning sense of indignation and horror. There seems to have been no feeling against the missionaries in the village to which they resided. The mob came from a city some miles distant, marched out to the sound horns, armed women and children who had given them no cause of offence whatever. The missionary question does not enter into insignificance when it is remembered that the motive of such outrages is less antimissionary than anti-foreign.

Given the opportunity and a match applied to the powder, and the Chinese would treat us all, even here in Hongkong, as they have treated the small missionery community

at Hussang. What led to the burning of Shameen in 1889? There was no question yesterday, and is expected here on a members the of missionaries there. It was simply an ontbreak of anti-foreign feeling, the sparks which set fire to the flame being it the first instance a fracus between some Customs employes and natives and afterwards row on a river steamer between a watchmat and a runner. On that occasion the foreigners happily had notice of the approaching mob and had a ready means of escape by the water, but had any of them fallen. into the hands of the rioters doubtless, their fate would have been similar to that of the ladies at Hussang. The outrage against which to-day's meeting is called to protest touches all foreigners in China. Here Hougkong, under the protection of garrison, we experience no personal feeling. of danger, but our interests are identical with those of our friends at the treaty ports and what touches them touches us. Missignary methods have often been adversely criticised in this column and the policy of literally carrying their lives in their hands, how any man can allow his anti-missionary views or sentiments to temper in the slightest enterfoil Order Books supplied on applica. degree his sense of indignation at the blood curdling atrocities perpetrated at Hussaug passes our comprehension. The foolbardipeas of the missionaries cannot be held to justify their marder, nor will the protest of to-day's meeting necessarily imply an endorsement of the missionary propaganda.

The Hongkong Daily Press reproduces carious paragraph from a Yokohama journai :-" The Kokumin calls attention to a new porce. lain were called ganshu or jewel-inlaid ware, specimens of which may be seen among the exhibits in the 4th Domestic Industrial Exhibition now open at Kyoto. This fin-de-siecle departure in ceramics was invented by Mr. Higuchi Barnbane, a shizoku of Saga Prefecture. His family have been porcelain manufacturers for generations past. After fifteen years of experimenting Mr. Higuchi susceeded in turning ont' the me were, which is sent transparent and inluid with jewels. He made it first in 1886 and patented it next year."

It is 'not unnatural that in attempting to obtalu an idea of a special kind of porcelain by translating a Japanese account of it, the translator should fall into errors unless he has knowledge of his own to guide him. In order, however, to save some eager collector from ornel disappointment, we may explain that Mr. Higuali's Ganju yaki is not a " semi-transparent porcelain inlaid with jewels." Somi-transparent it certainly is: all porcelula has that property. But the inlaying with jewels is a pure famoy of the trapslator. The ware in question is nothing more than an imitation of the well-known "grains of rice" percelain of the Chinese kilne; that it is to say, percelain having portions of the pate out out and filled in with glasing material only. It is a very beautiful method of decoration. and Mr. Higuchi deserves high credit for the specess he has achieved. But there are no "jewels inlaid "in the ware. - Japan Mail.

THE CAMPHON TREE IN INDIA.

It is not only in Ceylon that the idea of planting the camphor tree is attracting attention. Sovi to hand, the subject is seriously disoussed, and attention is drawn to the probable suitability of the cooler ravines and valleys of the hill countries in India. It is pointed out that the camphor tree is no stranger to this country. We have tolerably gand evidence from the records of the East India Company that at one time it flourished in Nepaul and the ancient kingdom of Tipra, or Tipperah, which, in the middle of the 17th century, embraced the lands between the present Megna and the Upper Irrawaddy. Even within the present century, campbor was ex Bell's Asbestos E. A. ported from Chittagong. The discovery by the prown & Co., H. Cotton Spinning and Weaving at Shanghai It is intended that the business should at first be confined to spinisher, the original reminment for which will be not less than 40,000 spindles. with Buildings and Machinery, Weaving Machinery will be added afterwards. Sufficient Engine and Boiler power for both purposes will be installed at the oniset.

The Company proposes to import the most approved Machinery, to acquire a suitable site. and to erect Mills for the manufacture of Cotton Yarus and Clothe best snited to the China

As is well known the importation of Machi-RESERVE FUND...... \$ 5.000,000 | nery by Foreigners has hitherto been officially TERREBUR LIABILITY OF PROP'TORS ... \$10,000,000 obstructed, but Chinese have been allowed to import Machinery under special permits, and 27th inst., at 11.80 A.M. Cotton Mills owned by them have been in successful operation for some years. At present, Mills comprising about 200,000 Spindles this port slone.

> portation of Machinery has been removed, and which will be glosed as follows :this fi ki of industrial enterprise is now open to Foreigners and Chinese slike. It is confidently believed that there still exists an epsuing for more Cotton Mills here, and that their product will successfully compete with and ultimately supplant that brought from aboard. It is evident that, as compared with Jap'n, the MAILS BY THE CANADIAN PACIFIC much more extensive markets of thing may be

> counted upon to consume a greatly inchessed The Colton Mills in Jupan operate some 900,000 Spindles, a very large propostion of the output of which is absurbed in that country. They draw their supplies of the raw material about equally from China and India and the 11.30 A.M. Post Office closes, but correspondence United States. The difference in cost of the raw material grown in China would favour Mills here as compared with those in Japan to a very

considerable extent. The markets for the coarse Yarns in China have Kitherto been chiefly supplied from India, whilst RIMAULT & CIE'S. small but increasing imports of Japanese Yarns hal alone averages over 195,000 bales of three piculs each augually, whilst the principal ports CHOW TUNG SEANG, Esq. Ewah Hot Churk, Etq. supplied with advantage to producer and con- microscopic insects which feed on the hair, and sumer alike by locally established Mills, work- supplies the roots with energy and nourishing outton of home growth.

An ample ampily of the Cotton may be counted upon, as the area of cultivation can be increased indefinitely to supply any increased flug repuls.

during the past few years may be cited. The grop rose from 5,700,000 bales in 1884 5 to 9.039,000 bales in 1891-2. It fell to 6.7.7.000 taint, it is equally successful. in 1892.3, but it is estimated that the past sea-AGENTS for the above Company, are range of prices the lowest ever recorded. Besides supplying the local market, the crop here during the past year has, been experted to the extent of 930,351 picula, an increase within four years of nearly 50 per cent. This exported 17 cotton would have kept running 160,000 spindles in addition to those stready at work. It would thus appear that a scarcity of raw material is not to be f-ared, whilst the competition of Indian and

American cutton in Japan will check an advance b youd normal prices in China-grown staple for The supply of labour is limitless, and it is already demonstrated that the natives soon becomes skilled operatives. The market for Yarns is at our own doors, and

may be expected to continue to expand indefinitely, as has been the case during the past Already locally produced Yarns command a preference in the market by reason of their beiter polour as compared with Indians. Of the Shares subscribed for, a large part bas been taken by Chinese Merchants interested to the trade in Yarns and Cotton goods.

Estimates of the working of the Mill have Carrent Rates and a guaranteed Houns equal bern carefully prepared from available data, which confirm the view that good profits may be confidently expected, and it is believed that the Bignature .
